

This **Heavy Duty** device is designed for use with heavy duty vehicles only. This device features a wide spectrum of features including engine diagnostics, harsh braking, rapid acceleration and much more. This device is also used for our Electronic Logging Solution (ELD). This device is only suitable for Canadian use.

This **Fully Integrated Ruggedized** solution includes a tablet, bracket and harness. Able to connect to ECU (Engine Control Unit), this solution is ideal for commercial vehicles, as it serves not only as an asset tracker but also as an Electronic Logging Solution (ELD).

Our **Robust** device is perfect for both heavy duty and light duty vehicles, making it easier for you to track your mixed fleet. Able to connect to ECU (Engine Control Unit), this device is ideal for fuel management, maintenance costs, Driver ID and trip logging. This device is also used for our Electronic Logging Solution (ELD), when utilizing your own smartphone or tablet through Bluetooth connectivity.

The **Hardwired** device is ideal for monitoring Driver behaviour, including Driver ID and the impact on your fleet vehicles. It has additional fleet management functionality from the Basic including PTO monitoring.

The **Basic** is the perfect concealing device. It's an economical, low powered tracker. This device is ideal for stolen vehicle recovery, auto rentals and any automotive tracking and locating purposes.

The **Rugged** device is for assets that endure a variety of weather conditions. It's weatherproof feature along with it's long-term reliability allows you to efficiently track your assets, including Operator ID. This device is ideal for assets that are disconnected and may sit for long periods of time.

One of our simplest devices to install, the **OBD-II** is designed for light-duty vehicles. This device is designed to monitor the health of your vehicles and Driver behaviours. No hardwiring needed for this device. It just simply needs to be plugged into the vehicles OBD-II port and you're all set!

Our **Battery Powered** device allows you to efficiently monitor your inventory. Whether you have large tools, porta potties, containers or even cows, the possibilities are endless with this unique solution.

Our **Camera** device allows you to capture real-time video footage of both forward facing and in-cab events, including facial recognition for detection of distracted driving, alongside real-time GPS tracking. This easily installed camera securely fits to your windshield. Ideal for any vehicle, you can retrieve footage at any point and hit the manual button for emergency situations, and video capturing. Take your Driver behaviour analysis to the next level with our multi-capable camera device.
