

Wearable surveillance with versatility.

Axis body worn.

With superior video and audio quality - the Axis body worn system allows you to deter crime, protect personnel, and document forensic evidence. Built on an open platform, you have the ability to integrate the system into your preferred content destination, giving you the flexibility to manage and store the video how you want. Additionally, you can choose from a variety of accessories to comfortably secure and position the body worn camera to support your specific needs. Plus, you can rest easy knowing your system is working correctly thanks to a three-year warranty.

Solution highlights

Open platform for direct integration with third party systems

Choice of video storage and management

Scalable system for a future-proof investment

Best-in-class cybersecurity

Free firmware updates

3-year warranty
